# Vertical Finger Duct Cable Manager

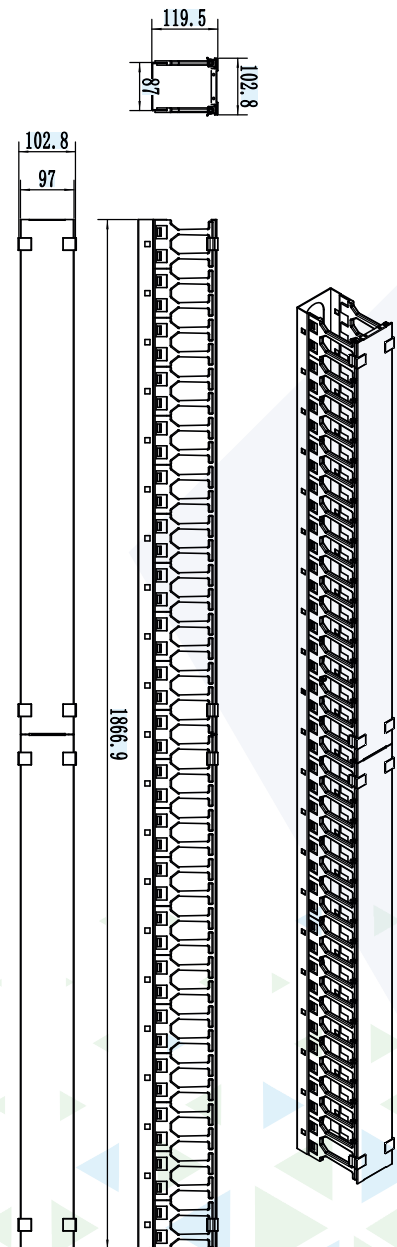

## ⊕ Features

This product stands out with its independent design, allowing for versatile applications. The mounting plate is conveniently accessible from both sides, enhancing user convenience.

Seamlessly combining metal and ABS flame retardant engineering plastics results in an exceptional solution that provides flexibility, safety, and efficient management for a variety of cables. Crafted from premium 1.2mm SPCC cold rolled steel along with an ABS frame retardant engineering plastics component, ensuring longevity and reliability in cable organization.

The surface undergoes a meticulous process including degreasing, picking, and phosphoric powder coating, enhancing its aesthetics and protective qualities.

Designed to fit cabinets with depth of 800 mm or greater
